

A design should

- measurable usability goal
 - specific users, tasks
 - measurable success criteria
 - time, accuracy, success, satisfaction
- performance > satisfaction

measuring usability

①	②	③
website	scenario	page
level	level	level

- must meet user needs
- must comply with basic web guidelines

Web Accessibility WAI

- guidelines so disabled can access the web
- W3C initiative

Nielsen's 10 heuristics

- ① visibility of system status
- ② match b/w system n real world
- ③ user control n freedom
- ④ consistency n standards
- ⑤ error prevention
- ⑥ recognition rather than recall
- ⑦ flexibility n efficiency
- ⑧ aesthetic, minimal
- ⑨ helps users recognize diagnose recover from errors
- ⑩ help and documentation

Gerhardt Powals heuristics

- ④
- ① auto make unwanted
- ② reduce uncertainty
- ③ fuse data
- ④ meaningful aids to interpret
- ⑤ consistent
- ⑥ limited data driven tasks
- ⑦ color graphics
- ⑧ only info needed

① - usability labs / equipment

① - remote testing

① in the wild studies

- natural settings

- no control

① long term studies
