

Class 9

22-Sep-2025

Mosque near
home

My home

Mazaar

Make a process flow of air student
orders, location, receives coffee, payment
feedback

Student opens app/whatsapp

student selects /types coffee

Student proceeds in order by selecting location, payment type, adjustments, time of order

order confirmed

coffee is prepared

student is delivered coffee

if payment is COD, take payment

order is reviewed on app

any feedback is reviewed on app

if online payment
receive payment

- there are billions of code written every day
- stores are full of apps
- yet utility is only 2% - why?
- it's not ghalat - it's just copy.

DESIGN - depends on cost

- ex make a charging station

what is budget? how many cars?
↓
who will afford?

ex gestures

- this is called TECHNOLOGY MYOPIA

i.e. I adapt acc to new tech. ↳ we use

- ex smart watch technology

CONCEPTUAL DESIGN

- query

- ~~more~~ explore

- command

PHYSICAL DESIGN

- ex you make a pathway that is long but people adopted short path
- so if you want people to follow yours - make a barrier

EVALUATIONS — how to evaluate designs

HEURISTICS — some rule of thumb made by experienced people that are adopted.

Apple HCI guide NUS

— standard, templates

— gemini can generate prototypes.

Why don't people use our software?

Why was iPod more successful?

— task performance — how many clicks user has to do to order a coffee

— the less the better but more problems

— time performance — ex kiosk was brought to reduce time, rush and tech, do I get user satisfaction?

maybe but more interested in food quality.

if I don't have clicks it's ok.

What if users don't like interface?

They do it just because no other fareeqa.

New forms of Measurement

- social media ka zamana hai - we prefer community
- do I get emotions?
- do I enjoy?

TRIANGULATION

- agar aik taraf se data a raha hai, but don't rely on it.
- ex 99% have good reviews - this is data fudging.
- so rely on sales → are they inc?
customer retention?
social media ka response?
- if both are +ve, then triangulation.
- if ~~done~~ ~~correct~~ anyone -ve, it is wrong!

EXPERIMENTAL RESEARCH

- mein yeh karna kyon chah raha hoon
- ex quizzes = attendance
- ex quizzes 75% check and prove your hypothesis.
- we analyse the data.
- how was the data observed?

DESCRIPTIVE RESEARCH

yeh hwa

RELATIONAL X is related to Y
agar yeh hwa tou yeh hoga

EXPERIMENTAL

agar

X is responsible for Y

DIARIES — jot down your thoughts

CASE STUDY — ex you make web/app

INTERVIEWS

ETHNOGRAPHY

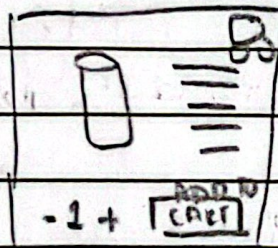

we do this to understand user behavior
via this we collect data.

Make interface of your coffee machine
for each state.

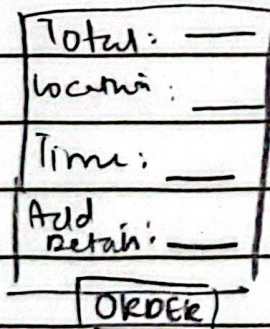

Stage 1: user opens app

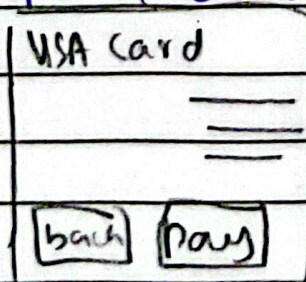

Stage 2: user selects coffee

Stage 3: user proceeds to order

Stage 4: if online, get payment

Stage 5: order confirmed.

Order confirmed!	
Detail:	
	

Stage 6: coffee prepared

orders:	order detail	order is preparing...
— <u>Select</u>	— —	— —
	— —	— —
	PREPARE/DELIVER	— —

client side client side userside

Stage 7: deliver to ~~client~~ user

Order Detail	order is delivering...
— —	— —
PREPARING	— —
DELIVER	— —

Client side

Stage 8: if WD, receive payment
no screen

Stage 9: order received

order completed!
<u>FEEDBACK</u>

How was your experience?

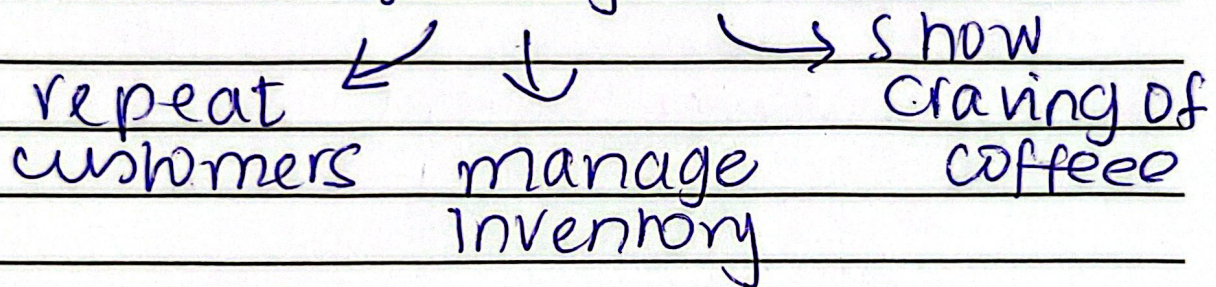

Stage 10: feedback
Same as 9.

Variables:

- time of majority orders
- subscription of repeat customers
- customer demographics
- as soon as opened, get discount
- ex entered maskan - give notif of let's place order.

DESIGN RULES

What is your goal?

There are some standards we need to meet

↓
guidelines
can be changed
principles are expert opinions / ideas

Strive for consistency

- keep consistency.

Heuristics - Expert opinion.
